

2025-26 School Assemblies

Character development in a way that is fun and effective! The 3 main themes of this program are:

1. It's whats inside that counts!
2. Great goals create great results!
3. Focus on your ACTIONS because your ACTIONS reveal your CHARACTER!

During this assembly we talk about character and actions. We focus on topics like respect, attitude, trustworthiness and that the potential of a country is created by the potential of the individual citizen!

Did you know that each school day over 1,100 students stay home from school because of bullying? It's time to shrink that number! The 3 main themes of Bulldoze are:

1. Confidence is your BEST defense!
2. Take a stand DON'T join in!
3. Silence is NOT Golden...tell a trusted adult!

In this assembly I share my own bullying experience and the nickname I got! We discuss how words have power and we need to think before we speak! I also share that words have power...and finally I share a story of a teacher that impacted my life with the phrase: inside each of us is a diamond waiting to be DISCOVERED!

The first of 3 Literacy programs I offer! The 3 key concepts of this assembly are:

1. Reading expands your imagination!
2. The more you read the more you KNOW!
3. Kids Who READ "R" COOL!

The perfect solution to excite kids about reading...
KIDS WHO READ "R" COOL

Creativity is a common thread throughout this assembly and how reading is a catalyst to imagination! I also touch on goals, ways to get into reading even if you don't enjoy it. At the end of the show I review the 3 themes, and when I get to the last point I say and Kids Who Read Are...and the students yell COOL!

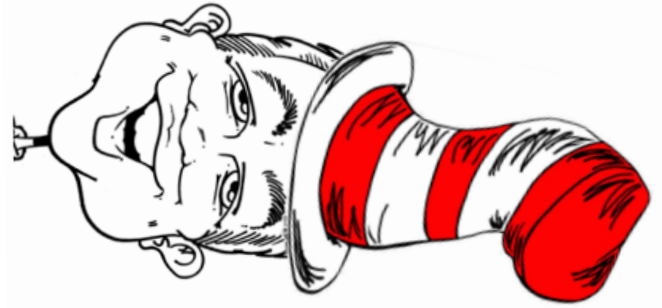

The 2nd literacy program is based on the 3 objectives of Theodore Geisels' writings:

1. He wanted students to enjoy **READING!**
2. He wanted students to empower their **IMAGINATION!**
3. He wanted students to learn an important lesson!

Throughout this fun and delightful program we talk about some of the characters and the meaning of the stories. In addition to the fun they absorb a deeper meaning from these iconic stories!

Seuss On The LOOSE!

The 3rd literacy program is based on how reading motivates us as individuals:

1. **SEEK** = answers (Desire)
2. **LEARN** = from books or other information sources (Action)
3. **LEAD** = Other People (Results)

This program continues to evolve because it's my latest literacy assembly that I continue to shape the show to meet the message that **READING** is a lifelong process that can **IMPACT** the world!

My Math Motivation assembly is aimed at students who don't enjoy math and inspire them to "add up" the great things it teaches:

1. LOGICAL REASONING
2. PROBLEM SOLVING
3. PATTERN RECOGNITION

This assembly shares a unique vision of math using it as entertainment which in turn gets students excited about math! While I'm trying to hook kids who don't like math, the kids who do like math find this program fascinating!

BRAND NEW ASSEMBLY FOR 2024-25!

My latest school assembly is been in the making for quite a while. In fact, I'm still working on it. The tentative name is "Science is MAGIC that works":

1. Ask a question
2. Do Background Research
3. Construct a Hypothesis
4. Test your Hypothesis

The goal of this assembly is to look at science in a fun way with a mixture science and silliness! In the end, I want the students to walk away with an understanding that science is a process. And that it is ongoing and can have many different results. And those results prove the hypothesis or not!

One of my first school assembly programs and one of the most popular! Working out conflict is very important in the school setting and this assembly teaches 3 key points:

1. Whether we agree with a person or not we treat each person with **R-E-S-P-E-C-T!**
2. We attack the problem NEVER the person!
3. Always work for a WIN/WIN solution!

During the course of this assembly we focus on the 3 points above and also...the importance of rules, following directions, mediation and the key to relating is cooperating!!

A subject that hits close to home for me! In this assembly I focus on 3 key points:

DRUGS STEAL THE MAGIC

1. Each of us has **MAGIC** inside us!
2. **DRUGS** steal and destroy the **MAGIC!**
3. Find the **MAGIC** within and share it with others!

Through this very important assembly we talk about how drugs are a multiple impact problem! I share a true story about 2 young men who died because drugs altered their perception. And the impact it had on the friend who tried to save them! I also talk about how we work together as a team to keep all of us safe from drugs!

For 14 years I was a firefighter for the Brooklyn Park Fire Dept.! I created a personal safety assembly that focuses on 3 core points:

1. Be Aware, of your surroundings!
2. Be Alert, to changes to your surroundings!
3. Be Safe, in how you respond to those changes !

This assembly is very important in this day and age with parents who work and are not home after kids get back from school. Simple safety steps are talked about in this fun presentation to help make their day safer!

**Be AWARE, Be ALERT,
BE SAFE!**

THE GOAL IS SIMPLE.

**To Share Educationally Significant
School Assembly Programs...**
